 This Sub-Fund is categorised as a Sustainability Focus Fund and complies with Article 8 of the SFDR. The following environmental and/or social characteristics are promoted: (i) a sustainability profile that is higher than its benchmark's sustainability profile; and (ii) a lower weighted average carbon intensity that the reference benchmark. This actively managed Sub-Fund mainly invests in equities and other equity interests of companies domiciled or chiefly active in the US. The Sub-Fund aims to select companies with total yields that are stable and above the market average. The Sub-Fund uses the benchmark MSCI USA (net dividend reinvested) to measure performance and the ESG profile, as well as for ESG and investment risk management⁵ and portfolio construction purposes. The Portfolio Manager may use discretion when constructing the portfolio and is not tied to the benchmark in terms of investment selection or weight. This means that the investment performance of the Sub-Fund may differ from the benchmark. For Share Classes with "hedged" in their name, currency-hedged versions of the benchmark may be used if available. The Sub-Fund may invest in financial derivative instruments for hedging purposes, for the purpose of efficient portfolio management or investment purposes (optimising returns) to the extent permitted under the Luxembourg laws. The Sub-Fund's net asset value may have a high volatility due to its investment policies or portfolio management techniques.
