Investment Strategy	
<ul style="list-style-type: none"> • This Sub-Fund promotes environmental and/or social characteristics and complies with Article 8 of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector. • The actively managed Sub-Fund uses the benchmark JP Morgan Asia Credit Index (JACI) USD as a reference for portfolio construction, performance comparison, sustainability profile comparison and risk management. The benchmark is not designed to promote ESG characteristics. For Unit Classes with “hedged” in their name, currency-hedged versions of the benchmark (if available) are used. The Portfolio Manager is not bound by the benchmark in its selection of instruments. Therefore, in times when market volatility is high, Sub-Fund performance may differ greatly from the benchmark. • The Sub-Fund invests the majority of its assets in debt instruments and claims issued by international and supranational organisations, public and semi-public bodies, and companies based in Asia or which are predominantly active in the region. In terms of interest rate and credit risk, the portfolio should be adapted to economic and financial market cycles by means of derivatives. • The Sub-Fund may invest no more than 20% of its net assets in fixed-income instruments denominated in RMB and traded on the CIBM or through the mutual bond market access between Hong Kong and mainland China (“Bond Connect”). • The Portfolio Manager may reach the goal of competitive total yield by means of dynamic asset allocation, involving the anticipation of predictable changes in market conditions. This may include long positions in view of increasing exposure and/or value or synthetic short positions for hedging purposes, achieved by means of legally permissible derivative financial instruments. • At no time may the Sub-Fund conduct physical short-selling. • The Sub-Fund may invest a maximum of 10% of its assets in bonds with a rating below CCC or with a comparable rating. • The Sub-Fund may invest up to 20% of its net assets in ABS, MBS, CMBS and CDOs/CLOs. • The Sub-Fund may invest in financial derivative instruments for hedging purposes, for the purpose of efficient portfolio management or investment purposes (optimising returns) to the extent permitted under the Luxembourg laws. • The net asset value of the Sub-Fund is likely to have a high volatility due to its investment policies or management techniques. 	<p>Refer to the “Investment Objective and Policies” section (Para 5) of the Singapore Prospectus for further information on the investment policy, investment principles and investment restrictions of the Sub-Fund.</p>
