### KEY PRODUCT FEATURES

#### WHAT ARE YOU INVESTING IN?

- You are investing in a sub-fund under the Company, an open-ended investment company with variable capital incorporated under the laws of Luxembourg which invests at least two-thirds of its assets in equities and other equity interests of emerging market companies.
- The Company aims to generate strong capital appreciation with a reasonable level of income, while giving due consideration to capital security and the liquidity of the Company’s assets.
- The Share Classes with “-acc” in their name are accumulating Share Classes and income thereof is reinvested and not distributed unless the Company decides otherwise. The Share Classes with “-dist” in their name are distributing Share Classes of which income thereof is distributed unless the Company decides otherwise, and you may receive monthly or quarterly distributions if you invest in a Share Class with “-mdist” or “-qdist” in its name respectively. Any distributions from the income and/or involving the capital result in an immediate reduction of the net asset value per share of the Sub-Fund. Distributions out of capital result in the reduction of an investor’s original capital invested in the Sub-Fund.

Refer to the “The Company”, “The Sub-Funds”, “Investment Objectives and Policies” and “Other Material Information” sections (Paras 1, 2, 5 and 18.1) of the Singapore Prospectus for further information on features of the product.
