	KEY PRODU	CT FEATURES						
 WHAT ARE YOU INVESTING IN? You are investing in a sub-fund under the Company, an open-ended investment company with variable capital incorporated under the laws of Luxembourg which invests at least two-thirds of its assets in equities and other equity interests of emerging market companies. The Company aims to generate strong capital appreciation with a reasonable level of income, while giving due consideration to capital security and the liquidity of the Company's assets. The Share Classes with "-acc" in their name are accumulating Share Classes and income thereof is reinvested and not distributed unless the Company decides otherwise. The Share Classes with "-dist" in their name are distributing Share Classes of which income thereof is distributed unless the Company decides otherwise, and you may receive monthly or quarterly distributions if you invest in a Share Class with "-mdist" or "-qdist" in its name respectively. Any distributions from the income and/or involving the capital result in an immediate reduction of the net asset value per share of the Sub-Fund. Distributions out of capital result in the reduction of an investor's original capital invested in the Sub-Fund. 								

¹ The Singapore Prospectus is available for collection during normal business hours from UBS Asset Management (Singapore) Ltd. 9 Penang Road, Singapore 238459 or any Approved Singapore Distributor. ² Inception date for the P-acc share class (being the earliest incepted Share Class).

³ Provided for available Share Classes incepted before 31 May 2023. Please refer to the Singapore Prospectus for the specific expense ratio of such Share Classes.

Investment Strategy	
 This actively managed Sub-Fund invests at least two-thirds of its assets following the principle of risk diversification in equities and other equity interests of companies that are domiciled or chiefly active in emerging markets. The Sub-Fund promotes environmental and/or social characteristics and complies with Article 8 of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector. The Sub-Fund focuses on equities and sectors that are considered particularly attractive and will actively assume risk proportionate to the potential opportunities. The Sub-Fund's assets are not limited to a particular range of market capitalisations, or to any geographical or sectoral allocation. The Sub-Fund uses the benchmark MSCI Emerging Markets (net dividend reinvested) for performance measurement, monitoring the ESG metrics, investment risk management⁴ and portfolio construction purposes. The Portfolio Manager may use discretion when constructing the portfolio and is not tied to the benchmark in terms of investment selection or weight. This means that the investment performance of the Sub-Fund may differ from the benchmark. For Share Classes with "hedged" in their name, currency-hedged versions of the benchmark may be used if available. Investors should note that the Sub-Fund's investment exposure may also include Chinese A shares traded via Stock Connects. The Sub-Fund may invest in financial derivative instruments for hedging purposes, for the purpose of efficient portfolio management or investment purposes (optimising returns) to the extent permitted under the Luxembourg laws. 	Refer to the "Investment Objective and Policies" section (Para 5) of the Singapore Prospectus for further information on the investment policy, investment principles and investment restriction of the Sub-Fund.
 The Sub-Fund's net asset value may have a high volatility due to its investment policies or portfolio management techniques.
